DETAILED ACTION

Receipt is acknowledged of the Amendment filed 9-28-2005.

Allowable Subject Matter

Claims 1-3, 5-6, 10-18, 22-25, 27-30, 32-33 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: one of ordinary skill in the art would not have been motivated to modify the teaching of Roy et al. and/or Bui et al. to further includes, among other things, the specific of the first and second control terminal drive signals being controlled such that the quiescent current conducted through the switch is substantially less than the current through two resistors whose parallel resistance approximates the characteristic impedance of a coupled transmission line (claim 1), the geometries, size and processing of the first and second transistors being scaled to achieve a controlled impedance and a quiescent voltage potential at the common node in response to an induced voltages (claims 12 and 31), a fifth transistor and a sixth transistor in series across a Vdd node of a first source potential and a Vss node of a second source potential and scaled to the first and second transistors, and a current source coupled to at least one of the fifth or sixth transistor that controls the quiescent current level in the first and second transistors (claim 12), the potential difference between the voltage sources coupled to the gates of the first and second MOSFETS being controlled by a current source (claim 17), the first and second operational amplifiers capable of producing gate drive signals greater than the power supply potential Vdd and less than the power supply potential Vs respectively

(claim 23), the first and second control terminal control circuits being operable from voltage sources that are greater than the source potential Vdd for the first control terminal control circuit and less than the source potential Vss for the second control terminal circuit and capable of providing control terminal control signals that are greater than the source potential Vdd and less than the source potential Vss (claim 33).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
